Performance, Fertility and Ultra Sound Tested

AC COBB CHAROLAIS

Cobb Upper Ranch and Bull Test Station

Cobb Lower Ranch in mid-July

55 Years of Bull Sales

WELCOME TO THE COBB RANCH 55TH SPRING BULL SALE

A.B. Buddy Cobb and Cecile Cobb bought their first Charolais in 1954 after seeing the white cattle in Arizona and were impressed by how well they did on the desert there. Later, they bought Maximiliano and Jalisco from the Michaelis family at Kyle, Texas, the original and premier breeding brought to Mexico from France beginning in 1930 by Jean Pugibet. Almost all our breeding stock has come from this exclusively linebred herd from the Michaelis family.

Linebreeding involves obtaining the best cattle for the foundation herd, then closing the herd to outside breeding, and breeding within the herd. Extensive and ruthless culling, coupled with extensive herd record keeping, is an absolute necessity in order to retain and track only those best characteristics which fit the breeder's goals, and to purify the stock from defects. The purpose of linebreeding is to refine and "set" the desirable genes within the gene pool order to produce greater predictability and uniformity of progeny. The famous "Line 1" Herefords developed at Ft. Keogh Livestock Experiment Station at Miles City are an outstanding example.

Buddy Cobb Joined the American International Charolais Association as a charter member and was a director. He was also a director and charter member of the old Pan-American Charolais Association. He joined the MT Beef Performance Association a year after it started. He was a charter member and director of the Mexican Charolais Association, and a charter member of the Canadian Charolais Association. In 1992 he was named as member of the Charolais Hall of Fame.

Cobb Charolais continues on with Cheryl and John Cobb, and Sarah and Mike Cobb families. John and Mike have grown up with these special Charolais. The operation has sold Charolais breeding stock for over 50 years, the first spring sale began in 1969, and we have second and third generation buyers. We truly appreciate all our customers. From the very beginning these cattle have been performance tested and selected for efficiency and economy, traits commercial cattle producers depend upon. These 60 years have allowed us to continuously improve and refine our product for consistent early maturity and fertility, more calving ease, heavy milking dams, structural soundness, and calm, docile temperaments, in addition to our trademark dependable gain and carcass traits.

In 2003, 36 head of newly banded Cobb purebred feeder steers averaged 3.77 lbs. of gain/day, with a 3.83 lb/day dry matter conversion, no growth implants or hormones. From this same group of steers averaged a dressing percentage of 63.7% off a 693 lb. carcass, live weight of 1088 lbs., averaging 2.2 sq. inch ribeye per cwt., with an avg. premium price to base weight at \$7.02 cwt. (data from independent feedlot). And these feeder steers were culls from the 2002 spring crop of bulls **before** the crop was placed on performance test.

The bulls we offer you have been screened and culled extensively for this sale, and are the results of over 50 years of performance testing and selection from Montana's first and original Charolais herd.

LINEBRED CONSISTENCY

August 1963

August 1998

MONTANA'S ORIGINAL CHAROLAIS RANCH

Performance Selection Since 1956

Records from Birth to Consumer

THE FERTILITY TESTING WAS DONE 3/12/24, SCROTAL MEASUREMENTS WERE DONE 3/12/24
AND BREEDING SOUNDNESS EXAM WAS DONE

BY HOFFMAN AI OF LOGAN, UTAH 3/12/24.

THE ULTRASOUND SCANS WERE DONE BY MATT LANE OF HUNTLEY, MT ON 3/9/24. THE ULTRASOUNDS
PROCESSED BY ULTRAINSIGHTS LAB OF IOWA AND THE AMERICAN INTERNAT'L CHAROLAIS ASSN.

DENNIS METZGER - AUCTIONEER

WESTERN LIVESTOCK AUCTION, GREAT FALLS, MT - 406-727-5400

DENNIS METZGER - SALE AGENT - 816-519-8208

'SIGHT UNSEEN' AND INTERNET BIDDING:

If you cannot be present at the sale, we can help you pick out what you want through our "Sight Unseen" program, and also provide you with an independent bid taker. We guarantee your customer satisfaction with the bulls, or your money back.

IF YOU WISH TO BID ONLINE, PLEASE FOLLOW THESE DIRECTIONS:

***Sale is broadcast **LIVE only on the website www.cattleusa.com**

1. ALL ONLINE BUYERS MUST BE PREREGISTERED ON THIS SITE PRIOR TO SALE DAY.
2. **Must call Barbara Jo at Western Livestock auction yard to confirm the registration** after submitting a buyer approval request on Cattle USA website
Western Livestock's office hours: Mon.-Thurs MTN time, 406-727-5400,
or email her: info@westernlivestockmontana.com

***Questions?

Please contact Barbara Jo at Western Livestock 406-727-5400 before sale day itself for answers, and to work out any remaining details.

TERMS—of the sale are only in U. S. Dollars currency in cash, check, or wire transfer unless the seller has approved other arrangements before the sale.

**A job well done from the Trotter Ranch:
Mike, Karen & family near Richey, Montana**

Crossbred feeder heifer and steer groups from the dry summer & fall 2007
Out of Stocker cows and Cobb Charolais bulls.

**All buyers must first register with the
Western Livestock Auction office before the sale.**

The office opens at 8 a.m. Mountain Daylight Time, phone number 406-727-5400.

DESCRIPTION OF SELLING PROCEDURES - TERMS AND CONDITIONS

PRELIMINARIES—will include essential announcements only, a brief description of the Cobb breeding program and the performance data in the catalogue and a review of the selling procedure. Thereafter bulls will be sold without pause, based on their records.

SALE ORDER—each in descending order of Weight Per Day of Age index.

AUCTION PERSONNEL—will include an auctioneer and at least two bid receivers.

THE SELLING ENVIRONMENT—every effort will be made to maintain a quiet atmosphere in which buyers can make their business decisions. The auctioneer will recite the current bid and the asking bid in a conventional chant, but will keep his delivery clear and deliberate. The delivery will slow at the end of bidding for each lot, to give the buyer some time to consider their bid decision. The animal must sell itself, based on its own record and appearance, supported by the seller's selective breeding program.

MINIMUM BIDS—The minimum bids shall be announced at the time of sale. All bulls will be sold to the highest bidder provided that the bid is not less than the announced minimum.

BIDDING—Bidders are requested to make clear signals to clearly identify the bidding. Potential buyers may request identification of the bidder at any time.

DISPUTES—among bidders will be settled by the announcer by reopening the bidding among the parties involved. If no further bid is made, the buyer shall be the party from whom the announcer accepted the last bid. The announcer's decision shall be final.

TERMS—of the sale are cash or check unless the seller has approved other arrangements before the sale. The right of property shall not pass and release of the cattle shall not be made until settlement is completed with the sale clerk.

PURCHASER'S RISK—begins as soon as the animal is sold. Bulls will be cared for at the seller's expense and the purchaser's risk until noon April 21, 2024 at the sale location.

CATTLE INSURANCE—will be available.

SHIPPING—all prices are F.O.B. Great Falls. Western Livestock Auction Center will assist in coordinating shipments immediately after the sale but no risk is assumed by Western Livestock or by the seller.

ANNOUNCEMENTS—from the auction stand will take precedence over printed matter in the catalogue.

CERTIFICATES OR REGISTRY—American-International Charolais Association registration papers will be furnished for the purebred bulls only if requested by buyer.

HEALTH—all animals are virgin bulls and can carry clearance for interstate shipment.

BREEDERS GUARANTEE—all bulls have been tested for breeding soundness and are fully guaranteed breeders. Bulls must be demonstrated to be non-breeders, barring accident or illness, under normal conditions at their first breeding season, if any adjustment is to be made. Any other guarantees are solely between buyer and seller. In no instance shall seller be responsible for more than the purchase price.

ACCIDENTS—although every precaution will be taken to protect the safety and comfort of buyers, neither the Western Livestock Auction nor the seller assumes any responsibility in this matter and disclaims any liability, legal or otherwise, in the event of accident or loss of property.

TRUCKING—A \$50.00 discount per bull if you truck your own bulls on sale day. Free delivery of bulls within 500 miles of Great Falls, MT to a central point. If bulls are to be trucked further than the 500 miles, buyer pays for the trucking amount AFTER this distance to the central delivery point.

EXPLANATION OF NUMERICAL VALUES

BIRTH WEIGHTS:

Birth weights themselves are no indicator of ease of calving. If the weight is in the length, very little calving trouble will develop. But if the weight is in the width or depth, trouble will be encountered. In our experience, it is the shape of the calf, more than weight that gives trouble.

205 DAY WEIGHTS:

They are mathematically corrected weights (not actual weaning weights) corrected as if every calf were born on the same day. The 205 day weight is the dam's milking ability. The bull has little to do with this factor except in crossbreeding. If you do not keep replacement heifers, the bull's 205 has no value.

NI-NURSING Index:

Cows are compared for milking ability. 100 is average. If you want to increase milk in your replacement heifers, pick a high NI.

145 Day Test Gain:

Our bulls are fed a high roughage ration, a specially formulated bull development feed provided for us by West Feeds, Great Falls, MT. Feeder calves are fed a high concentrate ration and should meet or exceed these gains.

145 Day Gain Index:

A comparison of gains, 100 is average. You must bear in mind that this is an index only within this particular herd and these particular animals. You cannot compare gains from one performance test to another due to different environment, climatic conditions, and rations.

Weight per Day of Age (WDA):

This is the most meaningful figure as to what the bull is himself. In our catalogue the bulls are placed and sold by WDA. You will notice that we have made no 365 day correction. The bulls WDA is for his individual lifetime of days from birth to the weigh-off date and weight. No correction of age of dam has been made.

WDA Index:

Comparison of WDA, 100 is average. WDA's are actual and not adjusted mathematically. If they were to be adjusted, those bulls from first calving cows would have much higher indexes.

Fertility Test:

All of these bulls have been examined for semen quality and structural and functional soundness. A fertility test only means that a bull's semen is capable of settling cows. We guarantee our bulls as breeders and fertile.

American-International Charolais Association papers will be furnished for the purebred bulls if desired upon request to sell.

Ultrasound

Ultrasound has been used to measure fat depth in beef cattle since the 1950's. Modern ultrasound technology can also measure ribeye area.

Carcass traits are supposed to be moderately to highly heritable. This means that the carcass characteristics of a bull will be passed on to his progeny, similar to average daily gain or weight per day of age.

Bull tests are based on average daily gain and weight per day of age. Ultrasound measurements go one step further and indicate whether bulls are growing muscle, or fat.

Fat: Back fat

Fat depth influences lean meat yield. Fat bulls have less lean meat in the carcass. Secondly the fat measurement gives an indication of the bull's fleshing ability.

Marbling (IMF or Intramuscular Fat)

Is the amount of internal fat in the muscle. A score of 3-3.9 is Standard (traces of marbling), 4-4.9 is Select (slight marbling), 5-5.9 is Choice, or small amount of marbling.

Ribeye Area

The REA indicates the ribeye area. The ribeye is the largest muscle in the body at birth, so REA gives an indication of overall carcass muscling. However, REA is influenced by body weight. Within a breed, the largest REA often belongs to the heaviest bull. Some REA is also expressed on a weight adjusted basis. Adjusting REA for body weight helps to determine which bulls are more muscular and which bulls are simply heavy bulls carrying a lot of weight.

As with all genetic traits, ultrasound measurements should only be compared among animals of similar age and breed that have been managed under the same environment. Since genetic improvement comes from within-breed selection, comparing measurements of individual animals from two different breeds is of little value. Finally, as with growth rate, carcass composition is partly dependent on the feeding program.

The importance of carcass trait information will increase as value based marketing and quality assurance programs become more widespread. However, many other traits such as reproductive performance, structural soundness, calving ease, growth rate and the birth, weaning and yearling weights must also be considered when incorporating carcass traits into a breeding program. Single trait selection is always discouraged.

TERMINAL SIRE INDEX

The AICA Terminal Sire Index (TSI) utilizes economic and management descriptions of your ranching operation, along with EPD on available Charolais bulls to assist in identifying the most profitable sires for your unique operation. ***Using economic selection index theory, this tool will generate dollar indexes per terminal progeny produced on bulls in the AICA database, ranking them for profit potential given the inputs you provide. The dollar indexes are to be interpreted much like single trait EPD. For example, if sire A's index is \$191.66 and sire B's index is \$200.00, then we would expect Sire B's offspring to average \$8.34 more net return (\$200.00 - \$191.66) than sire A's offspring.***

This program assumes all offspring are marketed based upon carcass value and replacement females are purchased or raised as a separate enterprise. Inputs should be provided based on historical information from your operation. **The TSI economic default value is based on a three year rolling averaged utilizing USDA data.**

It is important to remember that this is a Terminal Sire Index and should not be used as the sole selection tool for producing replacement females. *Producers should consider the appropriate traits for the selection of sires to produce replacement females.*

INTRODUCTION

In an ideal selection scheme producers would select breeding animals that excel in all traits. In reality though, this is not the case. Producers often find it necessary to make compromises in selection to balance the strengths and weaknesses among selection candidates. This is driven by the fact that unfavorable relationships exist between traits. Therefore, it is difficult for producers to weigh all the options appropriately given the various management programs and diversity among beef cattle. To make this decision even more challenging is the fact that not all producers sell beef cattle based on the same marketing grid.

A selection index is a formal method of combining Expected Progeny Differences (EPD) for different traits into one single value on which to base selection decisions. The AICA Terminal Sire Index uses estimates of the genetic relationships between traits and breeder historical input data on the cow herd a sire is to be mated along with marketing and carcass grid specifications to determine economic values to use in the index. These economic values are then multiplied by the EPD and summed to produce an overall index value for each animal for the selected scenario. This index places economic value on the various traits that are important to the given scenario.

The AICA Terminal Sire Index is unique in that it does not always return the same index value unless the herd profile and marketing scenario remains unchanged. This gives each producer the opportunity to customize the index by inputting herd profile data that may be unique to their operation.

Remember though that this is a Terminal Sire Index and does not indicate which sires would be the most profitable when retaining replacement females. Factors other than what are used in the index are important considerations for replacement females.

Producers also must use realistic information when inputting your herd and marketing profile. To illustrate this, try changing one of the variables in the profile without changing any of the others. For example, if all other profile data is unchanged and weaning weight is increased to an unrealistic value of 1000 pounds the index returns the lowest growth bulls available. This is because with the increased weaning weight and the length of the back grounding and feeding phases a producer would receive huge discounts based on overweight carcasses at harvest. One of the major benefits of this index is its ability to help match genetics to management programs.

Sire Listing Criteria

For bulls to have a Terminal Sire Index they must be registered with the American-International Charolais Association. Each bull must also have an EPD for BWT, WWT, YWT, MAT, REA, HCW, MARB and FAT.

PROGENY PROVEN SIRES: Must have sired at least 3 calves with performance data reported to AICA within the last two years and an accuracy value of .30 or higher.

UNPROVEN SIRES: 30 months of age or younger.
